

Android: Generic IMAP Setup with Gmail App

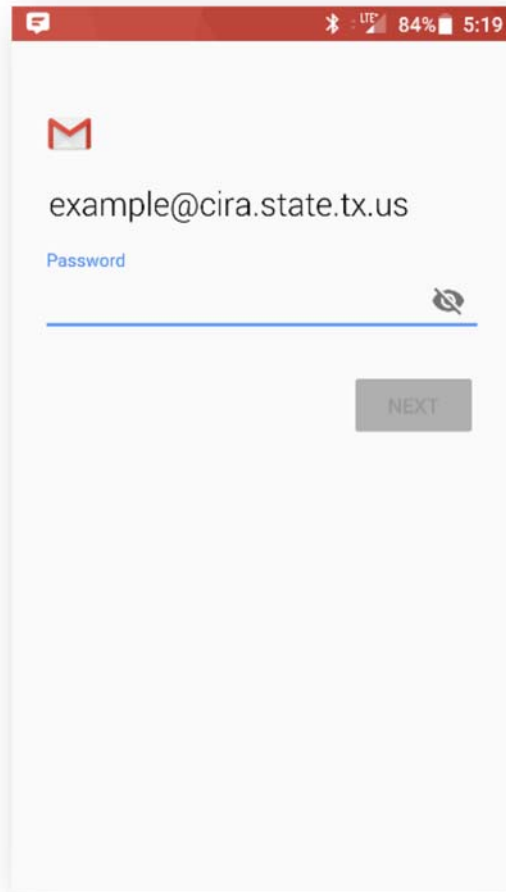

1. Launch the Settings app on your device.
2. Once it launches, tap on **Accounts**.
3. Tap on **Add Account**.
4. Select **Personal (IMAP)**, near the bottom of the screen, as the Account Type

5. Enter your email address: **example@cira.state.tx.us**

6. Type your mailbox password

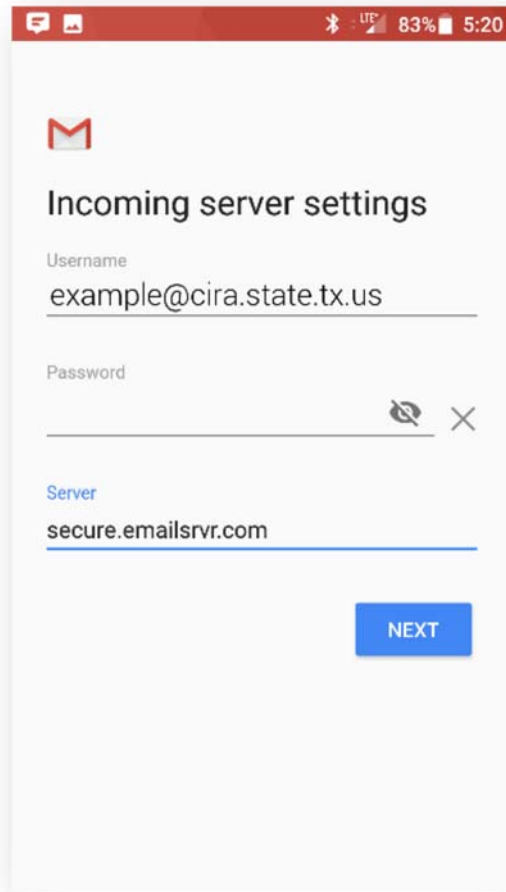

7. Enter the following incoming settings:

Username: example@cira.state.tx.us

Password: Your mailbox password

Server: secure.emailsrvr.com

8. Tap **Next**

9. Enter the following outgoing settings:

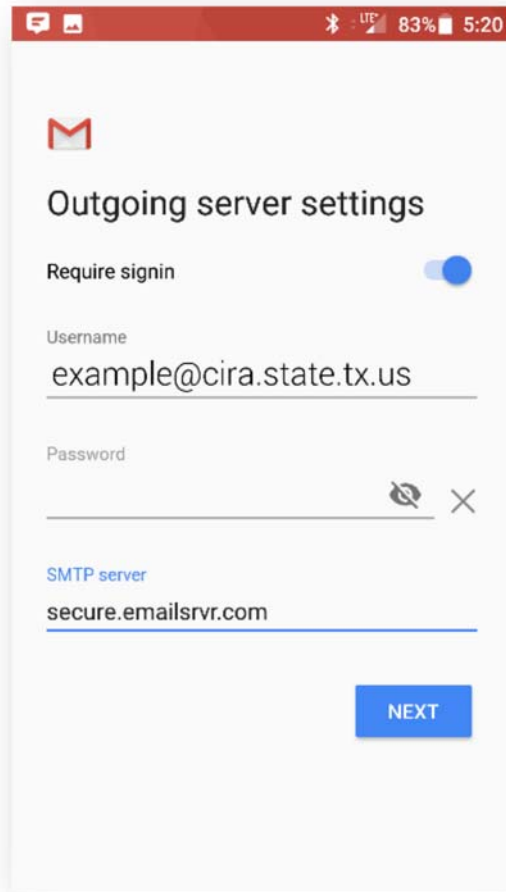

Make sure **Require signin** is enabled.

Username: example@cira.state.tx.us

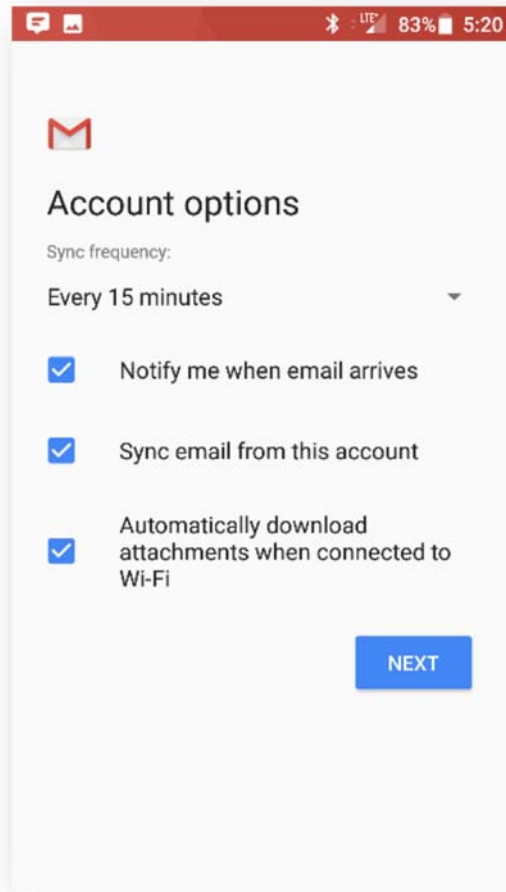

Password: Your mailbox password

SMTP Server: secure.emailsrvr.com

10. Tap **Next**

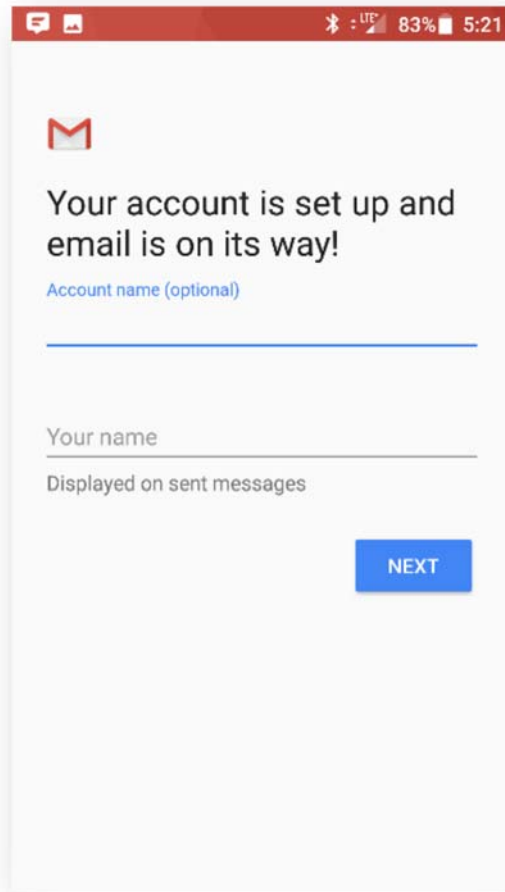

11. Select the options desired, and tap **Next**

12. **Account Name:** Used to distinguish account from others in the device

Your name: Name to be displayed in outgoing messages

13. Tap **Next**

14. **You are all set!** Go back to the main menu, open the Gmail app and your messages should start syncing. Please give it a few minutes to download data before troubleshooting.
