Didn't work? Check out these common issues...

- ☐ Authentication failed, Username/Password incorrect
Check that your username reflects exactly what you see displayed above. For certain mailboxes, the username will be different from your email address. If correct, try re-typing your

password.

☒ Send test e-mail message: Failed

Port 25 is typically blocked by internet service providers (ISPs).
Try changing the port within your Outbound Email Server settings. Alternative ports are 465, 587, 2525, 8025.

☒ Log onto incoming mail server: Failed

Verify your internet connection is stable. Then double-check that you've typed the "Incoming mail server" address correctly.
